

DEBASOFT A

Environmentally friendly anionic surfactant with high wetting power and excellent dispersing action.

Descriptive properties

Appearance	: Clear yellowish liquid
Concentration	: 29,2 - 30,8 %
Stability	: Very good over a wide pH range, good stability in hard water
Solubility	: Very good and spontaneous
Storage	: App. 2 years - dry storage-

Debasoft A is an excellent and highly effective wetting agent to be used in soaking of all types of hides and skins from fresh salted ones to dry ones thanks to its high cleaning and degreasing power. Debasoft A with its optimum foaming, wetting, emulsifying, washing and cleaning performance shows substantially high fat uptake capacity and its characteristic flash foam imparts outstanding cleanness to hides and skins.

In double-face production its addition to the washing improves the whiteness and brilliance of the wool. Debasoft A has a very good solubility even at very low temperatures.

Debasoft A has outstanding enzyme compatibility. As such we strongly recommend its combined use with enzymatic soaking auxiliaries.

Debasoft A has a positive and synergistic effect when combined also with other anionic, nonionic and amphoteric surfactants..

Application recipes

Soaking and wetting of raw hides and skins: 0,2 - 0,4 %

In double face for whiteness of wool: 0,5-1,0 g/l.

Remarks

Protect from freezing during transport and storage. The product properties are not negatively affected by freezing and the freezing is reversible: one must thaw slowly at room temperature and then stir until no longer turbid.

Packaging

120 kg in polyethylene drums or 1000 kg in IBC.

The information given in this technical leaflet is offered in good faith and is based upon our knowledge and experience of the products used. The suitability of the products mentioned to obtain specific properties or effects are given without obligation or guarantee and should be fully tested by the end user and adapted to suit prevailing works conditions or other products which may be employed.
