

EMDIRENAL CGL

General purpose liquid tannin based on modified gambir.

Descriptive properties

- Appearance** : Dark brown liquid
pH (1:10) : 4,0 - 5,0
Storage : Minimum 1 year - dry storage-

Emdirenal CGL has a wide range of applications but its most important characteristic is its retanning and dispersing power: Emdirenal CGL improves levelling of dyes, accelerates the distribution and penetration of anionic chemicals through the leather cross-section, improves dry-drumming resistance of the grain.

Emdirenal CGL as a retanning agent keeps the the character of chrome tanned leather, fills and softens the leather without any sponginess to obtain fine but not firm grain. As such the product is strongly recommende for buffed leather production.

Emdirenal CGL imparts strong burnishability and glazability to chrome leather.

Remarks

Please refer to its MSDS.

Packaging

120 kg in polyethylene drums.

The information given in this technical leaflet is offered in good faith and is based upon our knowledge and experience of the products used. The suitability of the products mentioned to obtain specific properties or effects are given without obligation or guarantee and should be fully tested by the end user and adapted to suit prevailing works conditions or other products which may be employed.
