

EMDIRENAL PHR

Special auxiliary for pH regulation during soaking.

Descriptive properties

Appearance	: Light beige powder, color fluctuations between batches may occur
pH (10% sol'n)	: 10,0 - 12,0
Storage	: App. 2 years -dry storage-

Emdirenal PHR is a very effective product used to control and regulate pH of the soaking bath in the soaking of all types of hides and skins from fresh salted ones to dry ones.

The required pH value in the soaking bath is reached slowly and very effectively and maintained during the whole soaking process.

Emdirenal PHR slowly increases the pH in the bath to the desired level and reserves the bath pH during the entire soaking process.

Emdirenal PHR has very good pH leveling action.

Emdirenal PHR can also be used effectively in special processes where hair is preserved.

Application recipes

In soaking baths 0,3 - 0,5 %

When working with high fat content raw material the necessary amount to be used will be higher.

Remarks

After the product is offered pH of the bath is stabilized within one hour. If there is a need to increase the pH, additional product must be offered.

Packaging

25 kg in kraft bags.
