

DEBASOFT TSN

Synthetic, lightfast synthetic softening auxiliary for improved mellowness and tensile strength, can lower unpleasant odor.

Descriptive properties

Composition	: Blend of fatty alcohols
Appearance	: Clear to yellowish pasty liquid
pH (1:10)	: App. 6,5
Charge	: Anionic
Solubility in water	: Easily soluble in cold and warm water
Stability	: Not stable to mineral tanning agents
Storage	: Minimum 1 year - dry storage-

Debasoft TSN stabilizes the fatliquor mix and improves the internal fibre lubrication throughout the leather giving mellowness and good tensile strength.

The leathers show wet and nice touch along with good tear resistance also the smell / odors caused by low-grade natural based oils are eliminated by the use of Debasoft TSN.

Remarks

The well-stirred fat mixture should be added to 3 times the quantity of water at 50°C.

The product may separate under extreme cold or warm storage conditions.

Before use, mix by stirring, pump circulation or any other suitable method below 15°C / -25°C.

For further information please refer to its MSDS.

Packaging

60 kg in polypropylene drums.
