

DEBASOFT WRT

Specialty for improved water resistance and touch.

Descriptive properties

Composition	: Based on siloxane
Appearance	: Colorless liquid
Charge	: Anionic
Solubility in water	: Not emulsifiable with water
Stability	: Not stable to mineral tanning agents.
Storage	: Minimum 1 year - dry storage-

Debasoft WRT while improving water resistance imparts silky like touch and a highly requested special character leading to dry drum nappa articles.

Application recipes

Together with fatliquors 10 to 20 % of fatliquor mix
In finishing together with IPA e.g. 300 parts / IPA 700 parts Debasoft WRT

Remarks

Not emulsifiable with water, only IPA or other solvents can dilute it therefore it is suggested to mix the product with a Debasoft fatliquor before putting it to the drum.
For further information please refer to its MSDS.

Packaging

200 kg in polypropylene drums.
