

DEBASOFT A5

Polymeric soaking agent with high detergency and excellent dispersing action developed to effectively reduce process time.

Descriptive properties

Appearance	:	Yellowish liquid
Concentration	:	App. 40 %
Stability	:	Very good over a wide pH range, very good stability in hard water
Solubility	:	Very good and spontaneous
Storage	:	App. 2 years - dry storage-

Debasoft A5 is an excellent and highly effective wetting agent to be used in soaking of all types of hides and skins from fresh salted ones to dry ones thanks to its high cleaning and degreasing power.

Debasoft A5 with its exceptional wetting, emulsifying, washing and cleaning performance shows substantially high fat uptake capacity and its excellent dispersion power imparts outstanding cleanness to hides and skins.

In double-face production Debasoft A5 greatly enhances the cleanliness and the brilliance of the wool. Debasoft A5 has a very good solubility and high dirt removal performance even at very low temperatures.

Debasoft A5 has outstanding enzyme compatibility. As such we strongly recommend its combined use with enzymatic soaking auxiliaries.

Application recipes

Soaking and wetting of raw hides and skins: 0,2 – 1,0 %

In double face: 0,5 - 1,0 g/l.

Remarks

No special measures necessary

Packaging

250 kg in polyethylene drums.
