

DEBAZYM STR

100% biodegradable, environment friendly and very strong degreasing agent with an enzyme blend for difficult leathers with high natural fat content.

Descriptive properties

Appearance	: Clear yellowish liquid
pH (1:10)	: 7,0-9,0
Charge	: Anionic
Solubility in water	: Easily soluble in cold and warm water
Stability	: Stable to electrolytes, mineral tanning agents, acids and bases under normal tannery conditions.
Storage	: App. 1 year - dry storage-

Debazym STR is an environment friendly and solvent free, highly strong degreasing agent for the production fur, double face and sheep nappa with high natural fat content. It has a special enzyme blend to improve its degreasing effect.

Debazym STR by its design disposes excellent wetting and dispersing power and yields impressive cleaning and degreasing effect. As such it can easily be used in soaking, liming, deliming and bating.

In double face and fur production, the use of Debazym STR greatly reduces the felting of the wools.

Application recipes

For hides and skins:

In soaking	:	0,4 - 0,5 % based on raw salted weight
In liming	:	0,4 - 0,8 % based on raw salted weight
In deliming	:	0,5 % based on fleshed weight

For skins:

In degreasing of raw skins	:	4,0 % based on fleshed weight
In degreasing of pickled skins	:	5,0 % based on pickled weight

For fur and double face skins:

In washing	:	0,5-1,0 g/l based on 20 lt/kg skin (paddle application)
-------------------	---	---

For fur and double face degreasing:

during depickling	:	1,0-3,0 g/l
during degreasing	:	5,0-7,0 g/l
during rinsing	:	1,0 g/l

Remarks

Before use, mix by stirring, pump circulation or any other suitable method below 15°C / -25°C.

Packaging

120 kg in polypropylene drums.
