

## DEBASOFT 7

***Softening auxiliary for very soft, fluffy, low density nappa leather types with silky touch.***

### **Descriptive properties**

<b>Composition</b>	: Softening esters mix
<b>Appearance</b>	: Yellowish brown
<b>pH (1:10)</b>	: 7,0 – 9,0
<b>Charge</b>	: Anionic
<b>Solubility in water</b>	: Fully miscible
<b>Stability</b>	: Stable to electrolytes under normal tannery conditions
<b>Storage</b>	: Minimum 1 year - dry storage-

Debasoft 7 has been developed to be used either as a single fatliquor or in combination with all anionic fatliquors from the Debasoft range for soft, fluffy nappa types with a silky touch.

Debasoft 7 imparts to the leather very good softness and very good fiber lubrication resulting fine grain and lightweight nappa leather with silky touch.

### **Remarks**

The well-stirred fat mixture should be added to 3 times the quantity of water at 60°C.

The product may separate under extreme cold or warm storage conditions.

The product should not be stored at temperatures higher than 45°C and should be protected from direct sunlight.

Before use, mix by stirring, pump circulation or any other suitable method at 15°C / -25°C.

For further information please refer to its MSDS.

### **Packaging**

145 kg in polypropylene drums.
