

DEBASOFT PLO NEW

Softening auxiliary for very soft, fluffy, low density nappa leather types with silky touch.

Descriptive properties

Composition	: Softening esters mix
Appearance	: Dark brown liquid
pH (1:10)	: App. 6,5
Charge	: Anionic
Solubility in water	: Easily soluble in warm water, 60°C
Stability	: Stable to electrolytes under normal tannery conditions
Storage	: Minimum 1 year - dry storage-

Debasoft PLO New has been developed to be used either as a single fatliquor or in combination with all anionic fatliquors from the Debasoft range for soft, fluffy nappa types with a silky touch.

Debasoft PLO New imparts to the leather very good softness and very good fiber lubrication resulting fine grain and lightweight nappa leather with silky touch.

Remarks

The well-stirred fat mixture should be added to 3 times the quantity of water at 60°C.

The product may separate under extreme cold or warm storage conditions.

The product should not be stored at temperatures higher than 45°C and should be protected from direct sunlight.

Before use, mix by stirring, pump circulation or any other suitable method at 15°C / -25°C.

For further information please refer to its MSDS.

Packaging

145 kg in polypropylene drums.
