

## EMDIRENAL RT3

***General purpose lightfast polymer with high dispersing and stabilizing power to improve grain tightness, softness and fullness.***

### **Descriptive properties**

<b>Composition</b>	: Acrylic copolymer
<b>Appearance</b>	: Colorless liquid
<b>pH (1:10)</b>	: 7,0 - 8,0
<b>Solubility in water</b>	: Easily soluble
<b>Storage</b>	: Minimum 1 year - dry storage-

Emdirenal RT3 has a wide range of applications but its most important characteristic is its stabilizing power: it improves and accelerates the distribution and penetration of anionic chemicals through the leather cross-section.

Leathers treated with Emdirenal RT3 show excellent grain tightness, softness and fullness with improved dye penetration and evenness even after buffing.

Emdirenal RT3 can also safely be used in chrome tanning and retanning to improve chrome exhaustion.

The use of Emdirenal RT3 in the production of waterproof full grain or nubuck leather is highly recommended.

### **Remarks**

Please refer to its MSDS.

### **Packaging**

150 kg in polypropylene drums.
