

EMDIRENAL RTH

Light fast synthetic neutralizing syntan with good buffering and dye levelling power designed for soft leather production.

Descriptive properties

Appearance	: White powder
pH (1:10)	: 6,5 – 8,5
Concentration	: App. 95 %
Solubility in water	: Completely soluble in water at 35°C
Storage	: Minimum 1 year - dry storage-

Emdirenal RTH has a mild and through neutralising effect on wet blue and wet white leathers without creating any lossiness.

Emdirenal RTH without bleaching the leather gives fine, tight and elastic grain with softness.

Emdirenal RTH reduces the reactivity of the anionic retannage, promoting penetration and preventing excessive reaction with the grain. Its use alone or combined with other neutralization agents improves the vegetable tannin, acid dyestuff, anionic tanning material penetration and evens the difference of acidities of other products, thanks to its excellent buffering property.

Remarks

Please refer to its MSDS.

Packaging

25 kg in kraft bags.
