

DEBASOFT BA

ZDHC Gateway PID: P713MR38

Multi purpose electrolyte stable anionic degreasing agent and light fast synthetic softening auxiliary.

Descriptive properties

Composition	: Sulphated fatty alcohol derivatives
Appearance	: Clear liquid
Charge	: Anionic
pH (1:10)	: App. 7,0
Solubility	: Easily soluble in cold and warm water
Stability	: Stable to electrolytes, mineral tanning agents, acids and bases under normal tannery conditions.
Storage	: App. 2 years - dry storage-

Debasoft BA imparts even fat distribution through the cross section of the leather. In the production of soft, light chrome leather with good tear strength, combined with or alone one can use it during soaking, degreasing, pickling, rewetting, chrome tanning and fatliquoring.

When Debasoft BA is added to soaking baths thanks to its fat dissolving and distributing capacity soaking and washing is greatly improved. When added to degreasing and washing baths Debasoft BA improves degreasing and much clearer pelts are obtained.

In rewetting of vegetable, wet white or chrome tanned leather shaving residues and other dirt are easily washed off and rewetting throughout the cross section is assured.

As a part of the fatliquor mix Debasoft BA acts as an emulsion stabilizer and creates a synergistic softening effect. The leathers show mild touch and good tear resistance and the grain tightness is not affected.

Remarks

The product may separate under extreme cold or warm storage conditions. Before use, mix by stirring, pump circulation or any other suitable method at 15 – 25°C.

Packaging

200 kg in polyethylene drums.

The information given in this technical leaflet is offered in good faith and is based upon our knowledge and experience of the products used. The suitability of the products mentioned to obtain specific properties or effects are given without obligation or guarantee and should be fully tested by the end user and adapted to suit prevailing works conditions or other products which may be employed.

We have undergone ZDHC MRSL testing against the Chem-MAP Protocol (Issue 5.0) referencing ZDHC MRSL Version 3.1 and have achieved LEVEL 3 Conformance for all of our products.
