

DEBAZYM WRN

ZDHC Gateway PID: P914FA47

Waterproofing booster enriched with an enzyme blend for all high standard waterproof leather types

Descriptive properties

Composition	: Synthetic waterproofing components with an enzyme blend
Appearance	: Pumpable liquid
pH (1:10)	: App. 7,0
Charge	: Anionic
Solubility in water	: Emulsifiable in cold and warm water
Stability	: Not stable to electrolytes and chrome salts.
Storage	: App. 1 year - dry storage-

Debazym WRN has been developed for use in combination with all anionic fatliquors to provide or improve waterproof character along with touch.

Debazym WRN imparts to the leather:

- High waterproofing with water vapor permeability
- Very good softness
- Silky touch
- Uniform dye shades

Debazym WRN has a slight bleaching effect which makes it very suitable for use in white and pastel colored leather production

Remarks

The well-stirred fat mixture should be added to 3 to 4 times the quantity of water at 60°C.

The product may separate under extreme cold or warm storage conditions.

Before use, mix by stirring, pump circulation or any other suitable method at 15°C / -25°C.

For further information please refer to its MSDS.

Packaging

120 kg in polyethylene drums.

The information given in this technical leaflet is offered in good faith and is based upon our knowledge and experience of the products used. The suitability of the products mentioned to obtain specific properties or effects are given without obligation or guarantee and should be fully tested by the end user and adapted to suit prevailing works conditions or other products which may be employed.

We have undergone ZDHC MRSL testing against the Chem-MAP Protocol (Issue 5.0) referencing ZDHC MRSL Version 3.1 and have achieved LEVEL 3 Conformance for all of our products.
